ECO Filters

环保滤清器

环保机油格和燃油滤清器是使用环保型材料制作而成，可以很容易地在使用完丢弃后被环境分解。机油滤清器众所周知的是其高过滤性、可靠性和耐久性，由耐用的高质量材料制成，以延长使用寿命，最终回报用户的是大量节省的金钱并有助于保护发动机，有效过滤污垢及其他污染物，使乾淨的机油或燃油流向发动机。

Ecological oil and fuel filters are made from paper and environment- friendly plastic that can be easily disposed off without extensive waste separation. ECO filters are known for their high filtration reliability durability. These filters are made of durable materials hence. their long service intervals which ultimately r edound to great savings by their users. It helps protect your engine by trapping dirt and other contaminants while allowing oil or fuel to flow to the engine.

PU Air Filters

PU空气滤清器

聚氨酯甲酸酯(PU)空气滤清器是为提供最小的气流限制和最高的污物阻挡通过能力而专门开发的发泡型设计，以确保持续在污垢方和乾淨方之间的密封。这些密封件是稳定的耐化学作用、耐老化并且耐温。PU空气滤清器的设计提供了弹性平衡和合身与更严格的密封。

Poly urethane (PU)air filters are made from specifically developed foam that offers minimal airflow restriction and very high dirt capacity to ensure continuous sealing between dirt and clean side. These seals are resistant to chemical effects, aging and are temperature stable. PU air filter are designed to provide balance and fits exactly for tighter seal.

PP Air Filters

PP空气滤清器

焔峰空气滤清器能除去在发动机进气系统中所夹带的混合在空气中的烟灰，碳粒，磨损料和其它污染物。高质量的空气过滤器才能有效防止混合在空气中的外来颗粒损害发动机并延长它的使用寿命。

The air Filter removes soot.carbon.abrasives and other contaminants from the air before the air mixes with fuel in the engine; induction system. Quality air filters lengthen engine life by preventing the introduction of damaging foreign particles to fuel mix.

Heat Sealing Air Filters

环保空气滤清器

环保空气过滤器可以去除并阻挡灰尘和污染物到达发动机，并维护发动机的性能。另一种设计，为客户提供了非凡的过滤效果。这种设计的一个附加功能是降低振动噪音。其独特的三层过滤的架构使过滤效果更加优越。

Air filter removes and traps dirt and contaminants before reaching the engine. Air filters are designed specifically to provide extraordinary filtering efficiency and engine performance. An additional capability of this design is its noise dampening performance to reduce Vibration noise. Its unique construction with triple layer filtering gives superior filtration.

Cabin Air Filters

空调滤清器

车用空调滤清器旨在带给车上乘客一个干净，健康的呼吸空间。针对室外空气在进入汽车前进行过滤，除去固体颗粒，如灰尘，花粉，霉菌和细菌等等。

Automotive cabin air filters designed to promote a clean and healthier breathing comfort to passengers in the vehicle. Outsider air are filtered and remove solid particles such as dust, pollen mold and bacteria as it enters the cabin.
